

# Recovery

Apollo Office Systems's CloudRecovery service is about planning and designing your business' Recovery Time Objectives (RTO) around each application. We provide cost effective high density and low density storage and complete Disaster Recovery as a Service solutions for automatic failover.

Disaster Recovery as a Service works by first securely safeguarding your data in our Cloud. Our recovery and de-duplication testing allows us to have the fastest Recovery Time Objective (RTO) in the industry, Our Disaster Recovery and Business Continuity solutions will secure your business data and ensure minimal downtime in the event of a disaster. Keep your business applications and data safe and accessible at all times with Apollo Office Systems's CloudRecovery.

Apollo Office Systems's Tier 3, Class 1 data centers feature on-premises security guards, an exterior security system, biometric systems, and continuous digital surveillance and recording. We meet and exceed standards such as HIPAA, PCI compliance, and the majority of other government security standards.

Replication to cloud virtual machines can be used to protect both cloud and on-premises production instances. In other words, replication is suitable for both cloud-VM-to-cloud-VM and on-premises-to-cloud-VM data protection. For applications that require aggressive RTO and recovery point objectives (RPOs), as well as application awareness, replication is the data movement option of choice.

Traditional disaster recovery solutions are expensive and inefficient. With the lowest total cost of ownership in the industry, you do not need to let a low budget get in the way of safeguarding and recovering your data. You do not have to be an enterprise-size business to receive the cloud's protection effectively. Apollo Office Systems helps to eliminate upfront costs while saving money on pricey equipment and maintenance with CloudRecovery. With our pay-as-you-go plan, pay for what you use and experience a service that is scalable according to your needs.

## Benefits of CloudRecovery

- Fast
- Secure
- Instant Restoration
- Constant Validation
- Unlimited Retention
- Pay-As-You-Go
- User Specified Backup Schedule
- We Protect Data
- Custom Designed DR Solutions
- Security is our Top Priority
- Tier 3/Class 1 Data Centers
- HIPAA and PCI Compliant
- 24x7x365 Support
- Government Grade AES-256 Encryption

Apollo Office Systems's CloudIntelligence team will listen to your business needs and design the right Disaster Recovery as a Service plan for your business. Apollo Office Systems offers a 100% uptime guarantee.

Our Cloud Recovery product set is backed by one of the most advanced Storage Area Network systems in the industry, NetApp. With its own proprietary file system and fiber channel network, our SAN's offer some of the best performance and redundancy available. Our RAID configurations ensure a fault tolerance of no less than two disks which offers one of the highest levels of availability while still offering blazing performance. After failing over to the cloud, you will wonder why you hadn't migrated sooner.
